Engineered for Surgical Excellence

Medical Metallic

Single use Instruments
Sterile & Non-Sterile

ABOUT US

Introduction:

Innova Surgical Supplies LLC launches in the United States in January 2026, backed by over 35 years of global experience in the export of high-quality surgical instruments. We specialize exclusively in precision instruments designed for patient safety, surgeon ease of use, and efficient cleaning and bioburden removal in Sterile Processing Departments (SPD)—delivering reliability, performance, and confidence in every procedure.

Mission & Objective:

Our mission is to supply premium-quality surgical, dental, veterinary, and diagnostic instruments at competitive prices. We aim to exceed customer expectations through superior quality, timely delivery, and strong professional communication. By adopting modern technology and sustainable practices, we strive for continuous improvement while maintaining social and ethical responsibility.

Our Goal:

To manufacture instruments that meet internationally recognized quality standards. We continuously improve product quality and after-sales services to ensure maximum customer satisfaction. Our goal is to exceed client expectations by demonstrating reliability, credibility, and strong adherence to both technical and ethical standards.

Unique Services:

We supply instruments according to any international reference catalogue, making us a reliable and flexible provider. Our large inventory ensures fast and consistent deliveries worldwide. Innova Surgical also offers 24/7 WhatsApp support and shares regular updates through our social media channels.

Complete Range of Below Categories

- ❖ Specialized in Single Use instruments (Non Sterile & Sterile)

- Environmental Management System cGMP Certified – Current
- Good Manufacturing Practice ANVISA Registered – Brazilian
- Health Regulatory Agency

SINGLE-USE INSTRUMENTS FEATURES AND BENEFITS

Single-Use Instruments

Single-use instruments and components are a popular choice for procedure pack companies and distributors. They are available in both sterile and non-sterile formats, can be purchased in bulk, and offer highly competitive pricing for producing cost-effective procedure packs. Our manufacturing facility produces these components and instruments in quality-assured, CE-marked, clean environments.

Sterile & Non-Sterile Instruments / Components

All sterile and non-sterile instruments and components are manufactured in hygienic, controlled areas under the supervision of highly skilled workers who follow international standards. Sterile instruments are packaged in sterile pouches for immediate use in surgery, while non-sterile instruments are packed in PE bags. Our extensive range of instruments and components makes us a reliable partner for procedure packers seeking high-quality and cost-effective products.

Dispose of Contamination, Not Quality

Although our single-use instruments are designed to be disposable, they are crafted with care. Every instrument is made from quality materials and meets strict industry and professional standards.

Save Time and Money (Seriously.)

Reusable instruments—especially cannulated ones—cannot always be guaranteed clean and are often prone to damage or require frequent replacement. Single-use instruments reduce costs by eliminating time spent cleaning reusable items and avoiding repair or replacement expenses.

Specialized In Disposable Instruments Sterile & Non Sterile
